WHAT IS MANGA?

Manga:
"Manga loosely refers to a style of cartoons originating in Japan. They usually are published in installments, and depending on their form, can be up to several hundred pages long. Many different genres are available, so they are popular with people of all ages and backgrounds. Known for their in-depth plots and characters, these well-respected works have been drawn for hundreds of years, although the modern version developed starting in the mid-20th century. How people define manga is somewhat controversial. Outside of Japan, the term usually means a cartoon or comic from Japan, and even more specifically, drawings by a Japanese mangaka — a cartoon/comic artist. In recent decades, however, people from other countries have started working in this style, and the Japanese traditionally have used the word to refer to any cartoon or comic, regardless of where a person drew it or where he or she lives. Some experts argue that it's better to categorize these works based on the specific characteristics usually found in the drawings for this reason." —wiseGEEK.org
