

## **Matthew Norman Bradley Mayoral Candidate**

A native to the area and a proud SHS graduate, at 41 years old I find myself having the time of my life both professionally and personally working remotely as Head of Training and Enablement for a large SLC based fintech. Aside from regular themed nights that include everything from tea parties to galivanting around the city in full superhero costume, my two daughters and I have picked up fostering animals from the local shelter throughout the pandemic including a three legged German short-haired pointer, a baby raccoon and a hermaphroditic orange tabby with blue/green heterochromia.

I was inspired to run when at the last Art City Days parade, I was given a flyer from a new member of the community who is running for city council. For the first time I began looking into how the citizens of our city are being represented and by whom and felt that I could contribute in a meaningful way, bringing more inclusion and fresh perspective to meet both current and future challenges.

I believe in Springville. I believe in our neighborhoods, schools, businesses, civic institutions and most of all our people. I hope you will believe in me, Bradley for Mayor.
