

## **Michael Snelson 4 Year Council Seat Candidate**

I am the president of Snelson PhotoColor Lab, a 47-year-old business in Springville. We have been successful in maintaining a viable business through challenging times in the photo industry. Because of these challenges, I understand the need for fiscal conservatism while at the same time providing cutting-edge services and products. I understand the need for the city to work together with businesses to provide growth.

During the last 3-1/2 years on the City Council, I have consistently supported a strong business environment. I have also been working with our Buildings and Grounds department to bring a new bike park and to work on our other city park assets.

I am currently working with the Parks and Recreation Board on a Parks and Trails Master Plan. I am also working with the Active Transportation Ad Hoc Committee on a new Active Transportation Master Plan. Working on both these projects puts me in a unique position to better serve the recreational needs of our citizens.

I am married to Jackie Hadley. We have six children and 20 grandchildren. I'm an avid cyclist and a competitive shooter in the sport of Cowboy Action Shooting.
